

# **55mm SKIRTING**

55mm x 14mm can be used as an architrave with 100mm x 14mm skirting.

55mm x 19mm can be used as an architrave with 140mm x 19mm skirting.

## **Fixing Instructions**

All surfaces should be clean and dry. We recommend sanding any previously painted area to improve adhesion.

Cutting the skirting using a conventional handsaw with a suitable mitre block.

The skirting can be fixed to the wall either mechanically or with liquid nails solvent free glue, any surplus adhesive should be cleaned off with a damp cloth. On uneven surfaces it may be necessary to use screws or nails to hold the skirting in position, these can then be filled with normal wood or plaster filler where necessary.

The white skirting is moisture resistant and can be used in areas of high humidity and is ready to paint and does not require any preparation.
